Are You Listening? Maximizing Communication in Pediatric Primary Care

Behavioral health concerns among children are very common, yet fewer than half of parents or caregivers report such concerns to children's primary care providers. Even when parents report concerns and receive referrals for mental health services, nearly 40% of such referrals are never completed.

Pediatric primary care providers routinely face difficulties engaging the caregivers of children with emotional and behavioral difficulties. **Training in communication skills has a profound and positive impact** on parental disclosure of children's behavioral health concerns and on every phase of treatment and management.

Using evidence-based, experiential training strategies, this workshop will give pediatric primary care providers enhanced skills and confidence working with children with behavioral health concerns. Small group exercises will be co-facilitated by mental health and primary care clinicians and parents experienced in clinician training. Learners will practice communication skills to build trust and engagement, and enlist families as partners in the care and treatment of troubled children.

Join this unique opportunity to strengthen your communication skills.

- When: Saturday, June 2, 2018
8 am - 5 pm
- Where: 150 West 30th Street, 15th Floor
New York, NY
- Cost: \$200 includes breakfast and lunch
- Register: https://www.flipcause.com/widget/widget_home/NzQx
- Questions? Contact Lisa Hunter Romanelli, Ph.D.
